Subject: Fair District Testimony

We need to restore confidence that every voter's vote counts. To do that districts must be seen as absolutely fair across the board, regardless of what party is in or we don't actually have a Democracy. When you can do that, you will prove that the people's voice makes the decisions, not the money of the corporations and the wealthy. I hope these meetings will not be just wasting our time, while the boys in the back room continue to screw over the American people as we have seen for far too long now.
